

FUNCTIONALITY

The advantage of the multidisciplinary operating room concept is that it pools most of the human resources in the anesthesia and surgical teams and therefore improves patient rotation and the sequence of programs, while centralizing activities in a single location.

It also has the advantage of allowing shared use of heavy equipment, reducing the need to move it around. It also adapts to most types of table: Fixed, transfer, or mobile, so that their accessories can be shared.

HI-CARE offers significant time savings in terms of OR availability. With its rounded shapes and smooth surfaces and thanks to the flush-mounting of all equipment, it is easy to clean and disinfect after each procedure.

Air flow

HI-CARE is carefully designed to be compatible with all (laminar flow) air filtration ceiling-mounted systems. It contributes to reduce the risk of infection and airborne contamination thanks to the centralisation of equipment in a single unit with a small space requirement.

It also offers the opportunity to protect the air flow in the surgical area from peripheral turbulence by equipping it with additional glass shielding made by the external suppliers of your choice (air processing specialists).

Integration of electrical equipment

Waterjet cutting gives HI-CARE's cover a precise, custom finish. This allows the possibility of integrating sockets and outlets of all different shapes. Electrical devices are flush-mounted, for easy cleaning and disinfection of the product.

Integration of gases

Every type of gas outlet standard (DIN, BS, AFNOR) can be integrated into the beam.

Thanks to these various configurations, the HI-CARE beam provides a modular concept to suit most situations and fulfil the needs of surgical teams.

Rails

The HI-CARE beam incorporates a 25 x 10 mm accessory mounting rail on its inner and outer faces all along its periphery.

Beam characteristics

Outer face equipped with power sockets and medical gas outlets. Outer and inner rails.

Outer and inner faces equipped with power sockets and medical gas outlets, and outer and inner rails.

CONFIGURATIONS

Beam configuration

SHUTTLES CONFIGURATION

Shuttles are equipped with a sliding trolley mounted on ball bearings.

With the indexed rotation angles, the position of therapeutic equipment and accessories can be adjusted between procedures, quickly and along the whole periphery of the beam. This provides an optimized work area for anesthesiologists, surgeons, and their teams.

The shuttle translation and rotation locking system, using a joystick, makes it easy and safe to handle the trolleys and the biomedical equipment.

Easy positioning of shuttles

Shuttles are equipped with $\varnothing$ 38 mm stainless steel tubes. They come in a choice of 800 mm or 1500 mm in height, and their payload is 150 kg.

Vertical equipment support tube

DISTRIBUTION BOX CONFIGURATION

To optimize the work area, this can be equipped with a distribution box mounted on a trolley or arm, according to your requirements.

Its sliding trolley mounted on ball bearings is equipped with a cable and hose control system allowing sliding of 1200 mm and electropneumatic braking of the translation movement.

Technical characteristics of boxes

The distribution box of HI-CARE suspended beam is available with or without offset arm.

Distribution box without offset arm

Distribution box with offset arm

Vertical

- Aluminum profile
- Equipped with three accessory mounting rails, 25 x 10 mm (two on the front panel and one on the back)
- Adjustable friction braking of rotation
- Optional LED position lighting located at the bottom
- Loading capacity : 150 kg without offset arm and 120 kg with offset arm
- Three heights for vertical box : 600 mm, 1200 mm or 1500 mm

Horizontal

- RAL 9016 with lacquered steel body
- Equipped with two vertical $\varnothing$ 38 mm accessory support tubes 800 or 1500 mm long
- Adjustable friction braking of rotation
- Optional : bottom accessory mounting rail
- Loading capacity : 150 kg
- Dimension of the box (L x W x D) : 760 x 324 x 267 mm

DISTRIBUTION BOX CONFIGURATION

Translation system

The distribution box is fed by the suspended beam.

Braking control

Located on the shelf, controls with illuminated button allow easy and ergonomic use of the arm rotation and translation system. They are engraved to allow intuitive operation of the box.

Extra tube system to hold accessories page 283

This device clamps onto the vertical service head (1200 and 1500 mm) and makes it possible to hang main biomedical accessories.

LIGHTING

The HI-CARE offers the following types of lighting:

- 100% LED general lighting
- Indirect with RGB LED modules
- Night light, located at the top

Lighting power

Lighting	Power	Types of sources	Color temperature	Luminous Flux ⁽¹⁾	Consumption	System Efficiency	Driver(s)
General lighting	68 W (2 x 4 Ft)	LED	3000 K 4000 K	10 325 lm	769,5 W	148,6 lm/W	Fixed / DALI
Reading lighting	9,8 W (2 Ft)	LED	3000 K 4000 K	1756 lm	11,8 W	149,2 lm/W	Fixed / DALI
Night light	3,1 W	LED	-	292 lm	3,3 W	89,8 lm/W	Fixed

Lighting study

Operating room configuration (□)	General lighting
	2 x 4 Ft module
	
Consumption	77,6 W
Average lighting	1394 lx

- Luminous flux maintenance factor : L80B10 to 60 000 hours
- MacAdam Ellipse: 3 SDCM
- LED sources photobiological risk : GP1

⁽¹⁾ All the luminous flux indicated in the brochure are based on the flux of the LED modules also known as system flux.

Luminaire output flux = (Module flux) x (optical efficiency), the optical efficiency of the luminaire is indicated in the Eulumdat file (LDT line 23) available for download on our website or on request.

Intensive care room configuration	General lighting	Reading lighting	Caring lighting
	Module 2 x 4 ft	2 ft module	General and reading lighting combined
			
Consumption	77,6 W	11,8 W	89,4 W
Average lighting	163 lx	617 lx	426 lx

Lighting to suit every context

□ configurations examples

Equipped with LED RGB lighting, dimmable, HI-CARE makes possible to change or configure your working environment. I.E, green color is recommended for endoscopy, red color can be used for cardiac surgery and blue color can be helpful for concentrating.

TECHNICAL CHARACTERISTICS

Ceiling mounting	Special design for each building Suspension up to 1500 mm plenum height Beam length up to 4500 mm without additional suspension
Suspended beam	Custom length (up to 5000 mm in single profile) Loading capacity 450 kg per segment Recommended distance for accessories 2000 mm
Equipment & accessory mounting	Outer and inner rail(s), 25 x 10 mm Loading capacity on rail 20 kg/linear meter
Equipment & accessory holder shuttle	Translation and positioning all along the length of the beam Mounted on silent ball bearings, mechanical lock for stability Dimensions: width 450 mm or 650 mm, height 800 or 1500 mm Loading capacity : 150 kg
Vertical distribution box	Translation and positioning over 1200 mm Loading capacity without offset arm : 150 kg Loading capacity with offset arm : 120 kg
Horizontal distribution box	Loading capacity : 150 kg
Indirect lighting	LED (2 x 4 Ft, 11 107 lm)
Direct lighting	LED (2 Ft, 1811 lm)
Night light	LED (355 lm)
Colors	White RAL 9016
