MESSAGE FROM THE MANAGING DIRECTOR

Respect for the environment and the development of our employees are at the very heart of our approach.

We are dedicated to deepen our commitments by continuing initiatives already started and to developing new ones.

As a part of its development and to provide the best possible opportunities for future generations, TRATO-TLV group is committed to a Corporate Social Responsibility (CSR).

1/ OUR ECONOMIC COMMITMENTS

To assert and maintain the values of TRATO-TLV Group

The **TRATO-TLV Group** is involved in a number of professional organisations and syndicates in order to gain a better understanding of the environmental aspects at every level of the company. In this context, it acts within its economic environment as:

■ A member of the **Syndicat de l'Eclairage (Lighting Syndicate)** which is a professional organisation for manufacturers of bulbs and lighting appliances. It is involved in promoting lighting as a whole.

■ A member and founder of **Ecosystem**, a non-profit-making eco-organisation responsible for collecting and recycling used bulbs. It has also been approved since 15 August 2012 for professional electrical and electronic equipment (DEEE Pro) in the building, industrial and medical sectors: lighting, regulation and inspection equipment, measuring instruments, medical equipment, etc. TRATO is in category 5 (bulbs and lighting equipment) and TLV is in categories 5 and 8 (lighting equipment and medical systems).

■ A member of **AFNOR** and a member of the S92D "Medical Gas Piping Systems" Standardisation Committee. The AFNOR association and its subsidiaries form an international group that serves the general interest and economic development. It designs and deploys solutions based on standards, which are sources of progress and trust. It is organised into 4 major areas of expertise: the standardisation, certification, publishing solutions and technical and professional information services and training.

■ A member of **the CCI Grand Lille Chamber of Commerce**. Its role is to represent the interests of industry, commerce and services before the local authorities.

■ A patron of the **La Piscine Museum in Roubaix (Musée de La Piscine de Roubaix)** in order to support and contribute to Museum projects, as well as to the enrichment and restoration of its collections.

■ Recognized Environmental Guardian by OPQIBI.

2 / OUR SOCIAL COMMITMENTS

Protecting and promoting TRATO-TLV Group's human capital

EMPLOYMENT AND TRAINING AT THE HEART OF OUR CONCERNS

In order to expand its activity, the Group regularly recruits new talents in order to acquire the new skills needed to grow the company. TRATO-TLV Group is committed to building solid teams by developing their skills through training programmes.

THE FIGURES

51

This is the number of hirings made within the TRATO-TLV Group in 2021.

Distribution of staff by gender and age

THE FIGURES

1700

This is the number of hours of training that were provided in 2021.

The recruitment of trainees and apprentices to adapt their skills to our business units and ensure the long-term growth of our company. New employees bring a fresh outlook to the company and help us develop our training programmes.

APPRENTICES

5

TRAINEES

3

ENSURING THE HEALTH AND SAFETY OF OUR EMPLOYEES

- Employee support for the entire company project by, for example, encouraging employees' "progress actions", which are rewarded by trophies
- The integration of disabled workers
- Regional collaboration with integration workshops (APRA)
- A partnership with CARSAT (Regional Retirement Insurance and Occupational Health Fund) within the TRATO-TLV Group CHSCT (Health, Safety and Working Conditions Committee)
- Employee training in "workstations and postures" workshops
- Regular inspections are carried out on all of our industrial tools
- Medical monitoring of Group employees by outside health organisations
- The introduction of indicators to monitor occupational accidents
- The provision of PPE (Personal Protective Equipment)

DATA 2021

* Absenteeism = (number of days of absence/number of working days) x 100

PROMOTING THE WELL-BEING OF OUR EMPLOYEES

Both of the production sites are going to be fitted with 100% LED lighting (Versus 30% in 2018) to contribute to the well-being of employees and improve their productivity.

3 / OUR ENVIRONMENTAL COMMITMENTS

To improve the environmental performances of the TRATO-TLV Group

Through innovations that are closely linked to its environmental and sustainable approach, the TRATO-TLV Group is committed to a CSR policy that has its effects day after day. This initiative is one of its priorities and it develops it every day by introducing practical initiatives within the Group. The TRATO-TLV Group is committed to limiting its impact on the environment by controlling the environmental aspects of its products upstream and downstream from the value chain.

LIMITING ITS ENVIRONMENTAL IMPACT BY COMPLYING WITH THE REGULATIONS

For several years, the Group has been committed to complying with the various regulations in force:

- **Directive 2011/65/EU**, formerly ROHS: this provides for the elimination at source, from the design stage, of certain dangerous materials in electrical and electronic equipment (EEE).
- **Directive 2012/19/EU**, formerly EEEW directives: this provides for the selective collection, treatment and other forms of recovery of electrical and electronic equipment.
- **Directives 2011/65/EU** (Limitation of Dangerous Substances in Electrical and Electronic Equipment) and **2012/19/ EU** (Electrical and Electronic Equipment Waste) introduce supplementary measures and aim to achieve the same goal: the protection of the environment and human health.
- **The European REACH regulation** (Recording, Evaluation and Authorisation of Chemical Hazards): its aim is to improve the protection of human health and the environment while maintaining competitiveness and reinforcing the innovative spirit of the European chemical industry. It is based on the principle that it is up to manufacturers, importers and downstream users to ensure that they manufacture, market, import or use substances that are not likely to be harmful to human health or the environment.
- **The APAVE inspection**: the Group has introduced an inspection of its installations with the APAVE organisation, which focuses on the electrical safety of its buildings and the safety of its machines.

REDUCE WASTE GENERATION

REDUCE PAPER CONSUMPTION OF OFFICES

The consumption of paper in 2021 was 2825 kg (+103% vs 2020). At the same time, we recycled 2825 kg of paper via our partner, Elise in 2021. 100% of the paper consumed by TRATO-TLV comes from sustainably managed forests and has an ecolabel. In addition, all of the Group's printers are configured to print on both sides of the paper as the default setting to reduce the consumption of paper. We will also provide each employee with a personal code so that printing cannot be started until the code has been entered into the copier. This will reduce unnecessary and orphan impressions.

THE FIGURES

2825 KG

The amount of paper consumed in 2021.

2825 KG

The amount of paper recycled in 2021.

ESTABLISH A WASTE REDUCTION PLAN

Particular emphasis is placed on using 100 % recyclable materials (e.g.: steel, aluminium, copper, cardboard, etc.) and developing a workstation waste management policy in order to recycle as much scrap material as possible. A specific process has been set up for processing wood, aluminium and metal waste, as well as for consumables printing.

In addition, as far as possible our products are delivered in large optimised packaging rather than individual boxes to reduce the volume of waste generated.

Lastly, we are constantly on the look out for solutions to minimise or eliminate polystyrene blocks from our packaging and only use 100% recyclable tape for all our packaging.

REDUCING OUR ENVIRONMENTAL FOOTPRINT

REDUCING OUR WATER CONSUMPTION

For several years now, the Group has no longer been using mineral water containers for water fountains in areas available to visitors and employees. We have installed a filtration system directly connected to our drinking water network in order to reduce the consumption of plastic containers and thereby reduce our environmental footprint.

OPTIMISING OUR ENERGY CONSUMPTION

TRATO-TLV has fitted all of its staff offices and some of the lower-traffic logistics areas with presence sensors that control the lighting to reduce electricity consumption. In addition, most of the offices are fitted with LED lighting that has a much lower environmental impact.

The offices are fitted with a district (or centralised) heating system to reduce over-heating, every heater is fitted with a thermostat. Furthermore, we have invested in equipment so that we have more energy-efficient and more effective resources.

In 2021, we want to equip both of our production sites with 100% LED lighting (30% currently have it) to reduce our energy consumption.

THE FIGURE

+21%

+21% energy consumption in 2021 compared to 2020. This is explained by the decrease in activity at TRATO-TLV in 2020 due to the Covid-19 and the strong increase in production for 2021.

DEVELOPING ECO-DESIGNED PRODUCTS

Using integrated optical design management to design more energy-efficient light fitting. An R&D department that has worked since 2009 to integrate LED technology into our product ranges. Promoting the use of LED technology by offering our customers ROI (Return On Investment). Working on thickness and shape optimisation to optimise the weight of raw materials. In addition, limiting the surface treatments applied to our products.

PART OF LED LIGHTING TURNOVER

COMMITMENT FOR THE ENVIRONMENT

As part of our commitment for the environment, TRATO-TLV Group is convinced that it's necessary to take action to offset our environmental impact and participate in the restoration of ecosystems.

So, we choose to support Reforest'Action. Indeed, we have chosen to finance the planting of 100 trees for TRATO, and 100 other trees for TLV, for a total of 200 trees for the Group.

In this way, we are actively participating in the reforestation and diversification of two forests in France.

-  **CLIMATE**
30 tonnes of CO2 stored
-  **BIODIVERSITY**
600 animal shelters created
-  **HEALTH**
800 months of oxygen generated
-  **EMPLOYMENT**
200 hour(s) of work created

TRATO RECYCLES YOUR CIGARETTES

The group called upon TCHAOMEGOT, a French company that collects and recycles the cigarettes ends. The cigarettes ends are cleaned up and recycled into eco-designed insulators for the building industry (soundproofing) or the textile industry (thermal insulation: padding for down jackets). This clean-up technic uses no water or toxic products. This innovative circular economy solution allows TRATO to further reduce its environmental impact.

<https://tchaomegot.com/>

RECYCLE THE WASTE WE GENERATE

In 2021, the Group recovered over 103 tonnes of non-ferrous metals (aluminium, copper). As a manufacturer and major user of aluminium, which is part of one of our raw materials, the TRATO-TLV Group is committed to working with companies who are experts in their field in order to sort and reuse this endlessly recyclable material. In addition, we attach great importance to sorting, collecting and recovering all ferrous metals. Indeed, we recycled 6 tonnes in 2021.

As our Group applies surface treatments to our products, we inevitably produce waste water that needs to be treated. We work with SUEZ, one of the market leaders, and collect waste water that can then be treated and cleaned up without adversely affecting the natural environment. In 2020, we recovered almost 2 tonnes of water from our paint line.

Lastly, we work with a specialist in cardboard collection to recycle and reuse our packaging. In 2021, almost 15 tonnes of boxes were collected.

THE FIGURES

6 TONNES

The amount of ferrous metal recovered.

103 TONNES

The amount of non-ferrous metals recovered.

15 TONNES

This is the amount of cardboard recycled and recovered.

ENCOURAGING THE SUSTAINABLE MOBILITY OF EMPLOYEES

PROMOTING SOFT MOBILITY FOR GETTING TO WORK

We provide employees with a secure area for bikes to encourage them to cycle to work.

BUSINESS TRAVEL

In order to reduce its environmental impact, the TRATO-TLV Group raises awareness among its employees to get them to rationalise work-related travel. Indeed, where possible, we encourage employees to use video conferences to limit unnecessary travel. If they really need to travel, we encourage them to minimise the teams attending, and, if possible, arranging several meetings on one location. We also encourage employees to travel by train where possible to reduce the environmental impact of work-related travel.

COMPANY CARS

The TRATO-TLV Group provides some of its employees with a company car. While we encourage our employees to limit their work-related travel, or use means of transport with a much lower environmental impact, some business travel is still necessary. Most of our fleet is made up of class A or B vehicles with the lowest CO2 emissions and, wherever possible we use French manufacturers in order to support the French industry.

NEW INVESTMENT FOR TRATO!

The environment is a priority at TRATO-TLV : selective sorting and recycling of the industrial and office waste, printing of our administrative documents on FSC-Certified paper... Therefore to continue these CSR initiatives the Group decided to equip its car park with electric charging stations. Their benefits are many : fuel savings, considerable reduction of our CO2 emissions, awareness of our employees and customers to this ecological energy mode... That is why TRATO installed 3 charging stations at the headquarters and intends to continue its efforts in the energy transition.

RAISING ENVIRONMENTAL AWARENESS AMONG EMPLOYEES

ELIMINATION OF PLASTIC CUPS IN OFFICES

The Group eliminated in 2020 plastic cups in its offices in order to reduce our consumption. With this in mind, we have provided every employee with a reusable, washable cup, made in France. We have also eliminated plastic cups during meetings and promote the use of glasses and mugs.

IMPLEMENTING SELECTIVE SORTING FOR OFFICE WASTE

For several years, the TRATO-TLV Group has been working with the company, ELISE, specialist in collecting and recycling, to optimise the sorting of office waste: paper, plastic cups, cans and plastic bottles. All our employees have been trained and made aware of the good practices to adopt so they can also implement them at home. This initiative also creates local and long-term job opportunities for people in need. By way of example, we created almost 36 working hours in 2020. We communicate twice a year via our internal newsletter on the amount of waste collected so that employees can assess the impact of their waste thereby contributing to greater awareness. We also attach considerable importance to sorting and recycling the ink cartridges from all of our printers.

OFFICE WASTE
RECYCLED AND
RECOVERED IN
2021

According to valuation report Elise 2021

We have also implemented selective sorting for coffee pods. All of the used pods are taken to a collection point so that the aluminium can be 100% recycled and the coffee grounds converted into energy and fertiliser for the agricultural sector.

OPTIMISING THE USE OF DIGITAL TOOLS

We encourage employees to adopt simple steps to limit energy consumption: disconnecting devices when they are not being used, turning off computers during breaks of more than 15 minutes, adjusting the brightness of the screen so that it uses less energy. We are going to set up an internal poster campaign on good, ecologically responsible practices in the daily use of digital tools.

4 / OUR ETHICAL COMMITMENTS

**Working together to ensure the highest standards
in our daily business conduct**

CODE OF ETHICS AND BUSINESS CONDUCT

The TRATO-TLV Group has drawn up a code of ethics and business conduct. This Code brings together the basic principles that illustrate our joint commitment to the highest standards in our daily business conduct. It sets forth the standards of conduct that should motivate each and every one of us as employees of the Group, as well as our partners and suppliers. The code of ethics and business conduct drawn up by TRATO-TLV has been sent to all employees of the Group, and they undertake to comply with it while conducting daily business in the company. Every new employee is also informed of the Group's principles of ethics and business conduct and, by signing their employment contract, undertakes to adhere to this code of conduct.

SUSTAINABLE PURCHASING POLICY

The TRATO-TLV Group involves its suppliers in its responsibility approach through a sustainable purchasing policy. The sustainable and responsible purchasing charter is sent to all our suppliers.

INTERACTING WITH THE SOCIAL AND SOLIDARITY ECONOMY

TRATO-TLV works with the APF (Association des Paralysés de France (French Association for the Paralysed), now called Association France Handicap) and ESATs (employment support centres for disabled people) to enable individuals with a physical disability or a mild or moderate learning disability, to carry out a professional activity adapted for people who are unable to work in an ordinary setting. These organisations also develop their expertise and interpersonal skills to help them integrate into the workplace.

OUR COMMITMENTS AND GOALS FOR 2022

OUR ACHIEVED GOALS IN 2021

- To provide all our employees who work in an office with reusable cups
- To inform all our suppliers about our sustainable purchasing policy

SOCIAL

OUR COMMITMENTS

- To guarantee the health and safety of our employees
- To ensure that all our employees adhere to our company project
- To offer a work environment that promotes the well-being of employees

OUR GOALS FOR 2022

- To increase the number of hours of training undertaken by employees by 5%
- Maintain our work accident rate
- To reduce the absenteeism rate in the Group by 2%

ENVIRONMENTAL

OUR COMMITMENTS

- To reduce our energy consumption
- To reduce paper consumption in offices
- To raise environmental awareness among employees

OUR GOALS FOR 2022

- To reduce our energy consumption by 5% on both of our sites
- To equip all of 3 production sites with LED lighting
- Dematerialize the pay slips of all our employees

ETHICAL

OUR COMMITMENTS

- To promote ethical conduct to all of the Group's employees but also to all our suppliers
- To implement a responsible purchasing policy and involve our suppliers

OUR GOALS FOR 2022

- Have 100% of our TOP 20 suppliers sign our sustainable purchasing charter
